Baramati Agro Ltd.

MAX BOOST-4

“Boost your Animal to boost your profits”

Key Features:

- Specially designed to satisfy nutritional requirement of High yielding Indigenous & cross breed, cows & Buffaloes.
- Increase Milk yield by 2-3 Lit. and fat, SNF %
- Helps to maintain body score condition of cows
- Contains all essential nutrients and feed made by modern technology
- Useful in Cows producing 20 to 35 Lit. milk and Buffaloes producing 10 to 18 Lit. Milk per day
- Pellet Size: 4mm
- Availability: 50 Kg HDPE
- Dose: 350gm/Lit. of Milk and 1 kg for body maintenance

MAX CREAM

TDN 72%

FAT 5%

PROTEIN 23%

Key Features:

- Complete balanced feed for high milk producing cows and buffaloes
- Having Bypass fat, Protein, vitamins, and minerals
- Increase in milk production, milk quality
- Useful in Cows producing 12 to 25 Lit. milk and Buffaloes producing 10 to 15 Lit. Milk per day
- Pellet Size: 4mm
- Availability: 50 Kg HDPE
- Dose: 350gm/Lit. of Milk and 1 kg for body maintenance

MAX MILK

TDN 70%

FAT 4% /3.5%

PROTEIN 22%/20%

Key Features:

- Contains high quality nutrients leads to increase in milk and milk quality
- Contains balanced minerals increase in Conception rate
- Best cattle feed for Cows producing 12 to 25 Lit. milk and Buffaloes producing 10 to 12 Lit. Milk per day
- Pellet Size: 4mm
- Availability: 50 Kg HDPE Bag, 70 / 20 Kg in south & 60 Kg Jute bag
- Dose: 400 gm/Lit. of Milk and 1 kg for body maintenance

DUGDHDHARA MILK PLUS

TDN 70%

FAT 4.5%

PROTEIN 22%

Key features:

- Contain proteins, energy, minerals and vitamins in adequate quantity and proportion to meet the nutritional requirements of high yielding dairy cattle.
- Enhance milk production by 2-3 Lit., reproductive ability, and the overall health of cattle.
- Dose: Cattle 400 gm/Lit of milk; Buffalo 500 gm/Lit of milk
- Useful in Cows producing 10 to 25 Lit. milk and Buffaloes producing 10 to 12 Lit Milk per day
- Pellet Size: 4mm
- Availability: 50 Kg, 59 Kg HDPE Bag & 60 Kg Jute bag

DUGDHDHARA

TDN 70%

FAT 3.5%

PROTEIN 20%

Key Features:

- Increase in productivity and health of cattle
- Useful in Cows producing 8 to 20 Lit. milk and Buffaloes producing 8 to 10 Lit. Milk per day
- Increase in milk production by 1-2 Lit. and milk quality
- Pellet Size: 4mm
- Availability: 50 Kg, 59 Kg HDPE Bag & 60 Kg Jute bag

AGRO BYPASS

Key Features:

- Increase in productivity and health score condition of cattle
- Useful in Cows producing 10 to 20 Lit. milk and Buffaloes producing 6 to 8 Lit. Milk per day
- Increase in milk production and milk quality
- Pellet Size: 4mm
- Availability: 50 Kg HDPE Bag,

AGRO GOLD

Key Features:

- Economically beneficial good quality feed
- Useful in Cows producing 8 to 15 Lit. milk and Buffaloes producing 6 to 8 Lit. Milk per day
- Improves reproductive efficiency & health
- Pellet size: 4 mm
- Availability: 50 Kg & 60 Kg jute bag

AGRO MILK

Key Features:

- Useful in Cows & Buffaloes those fed with home mix
- Improves reproductive efficiency & health
- Pellet size: 4 mm
- Efficacy: 05 to 15 lit. milk producing average cows
- Availability: 50 Kg, 59 Kg HDPE Bag & 60 Kg jute bag

SANJEEVANI

Key Features:

- Economically balanced quality feed.
- Improves reproductive efficiency & health condition
- Benefits: Maintain in milk production & body maintenance
- Pellet size: 4 mm
- Efficacy: 5 to 10 lit. milk per day
- Availability: 50 Kg & 60 Kg jute bag

UMED

Key Features:

- Economically beneficial maintenance feed in scarcity period.
- Benefits: Useful for production & body maintenance.
- Can be used as supplementary feed in home mix
- Pellet size: 4 mm
- Efficacy: 5 to 10 lit. milk producing average cows.
- Availability: 50 Kg & 60 Kg jute bag.

VARDAN

Key Features:

- Improvement in body health condition when fed with home mix
- Increase in milk production
- Increase in reproductive performance in buffaloes
- Benefits: Increase in milk production
- Pellet size: 4 mm
- Efficacy: 10 to 15 lit. milk producing low quality cattle & buffalo
- Availability: 50 Kg HDPE bag & 60 Kg Gunny bag

SHEEP & GOAT FEED

Key Features:

- Useful for stall feeding & loose housing system
- Contains highly palatable and nutritious ingredients that appeal to goats.
- Specifically formulated to create a nutritionally balanced diet for goats.
- Enough energy to maintain constant body weight
- Contains mineral and vitamin supplement specifically formulated to meet the needs of goats.
- It contains high nutrients leads increase in conception rate
- Increase disease resistance power of goat & sheep
- Dose: 200gm to 400gm day for adult, Kids 50-100gm/day
- Availability: 50 Kg HDPE bag

GARBHINI

“Special nutrition for pregnant cows,
increases productivity of milking cows”

Key Features:

- Better growth of foetus and cow deliver strong, healthy calf. Improve udder cells growth and increase milk production in successive lactation.
